## **Maintenance and Cleaning**

Eliminate dust on the material using a soft cloth. For a more thorough cleaning, it is recommended to regularly clean surface with a soft cloth and a solution of warm water and mild soap.

To clean more difficult stains, intervene as soon as possible, and follow the instructions listed below, noting which method to use, 1, 2 or 3, based on how long the soil has been on the fabric:

1. The product is easily cleaned with a damp soft sponge using plenty of soap. Never use abrasive sponges. Clean surface and rinse thoroughly. Dry the treated area with a soft towel.
2. The product is easily cleaned with a cotton ball soaked in rubbing alcohol. Completely wipe and clean quickly using a soft sponge. Thoroughly rinse and dry the treated area.
3. The product is easily cleaned by wiping gently with a cotton ball soaked in milk, then rinse thoroughly and wait until the surface is completely dry before using it.
